Preg test provided

EC provided on site

EC offered but client declined

Referred to provider for EC

Advocate reviewed this info with client at intake:

Futures Without Violence Safety Card

Birth control methods

EC information

HIV/STI testing information

*Many individuals who have come to our program have experienced situations that put them at risk for unwanted or unplanned pregnancies. If this is something that you are concerned about, we can get you a pregnancy test, help you get information about methods of birth control that your partner doesn't have to know about, or help you get emergency contraception. Emergency contraception is a safe medication that can prevent you from getting pregnant if you have had sex within the last 5 days (it's also called the morning after pill or Plan B). You don't need a prescription. (Allow the person a few moments to think about what they would like to ask).*

#### 1. Are you currently pregnant or concerned about being pregnant?

No

↳ ***If no, offer the information below. Continue with Questions #3-5.***

✓ Offer Futures Without Violence Safety Card

*We give this to everyone we talk to...*

✓ Offer information about birth control methods

*(Refer to safety card) "There are safe and effective methods of birth control your partner does not have to know about."*

✓ Offer information about emergency contraception.

*(Refer to safety card) "Emergency contraception can be taken up to 5 days after unprotected sex to prevent pregnancy. But it will not hurt you or undo your pregnancy if you are already pregnant."*

✓ Offer information about STI/HIV testing

*"If you are concerned about HIV or sexually transmitted infections, we can help you get testing that is free and confidential."*

**Yes, currently pregnant**

↳ **If currently pregnant, offer the information below. Continue with Questions #3-5.**

- ✓ Offer Futures Without Violence Safety Card  
*We give this to everyone we talk to...*

- ✓ Offer information about birth control methods  
*(Refer to safety card) "There are safe and effective methods of birth control your partner does not have to know about."*
- ✓ Offer information about emergency contraception.  
*(Refer to safety card) "Emergency contraception can be taken up to 5 days after unprotected sex to prevent pregnancy. But it will not hurt you or undo your pregnancy if you are already pregnant."*
- ✓ *Is there anything else about your pregnancy you are concerned about or need help with?*

**Yes, concerned**

↳ **If concerned that the individual may be pregnant, continue with Questions #2-5.**

2. **Have you had a situation when you could have gotten pregnant in the last five days? For example, have you had experience with a condom breaking, being pulled off, falling off or staying in you? Have you forgotten to take your birth control?**

**Yes**

↳ **If yes, provide EC information and offer Emergency Contraception.**

- ✓ *(Refer to safety card) "Emergency contraception can be taken up to 5 days after unprotected sex to prevent pregnancy. But it will not hurt you or undo your pregnancy if you are already pregnant."*
