

RELATIONSHIP ASSESSMENT TOOL

The Relationship Assessment Tool is a screening tool for intimate partner violence (IPV). The tool, developed by Dr. Paige Hall and colleagues in the 1990's, was originally named the WEB (Women's Experiences with Battering). Terminology has since evolved in the field and the unique characteristic of this assessment tool which measures women's experiences in abusive relationships is more accurately reflected by using the name, Relationship Assessment Tool. References in the literature and publications use the original name, the WEB. The Relationship Assessment Tool and the WEB are the same tool and therefore supported by the same validation studies and research.

As opposed to focusing on physical abuse, the Relationship Assessment Tool (WEB) assesses for emotional abuse by measuring a woman's perceptions of her vulnerability to physical danger and loss of power and control in her relationship. Research has shown that the tool is a more sensitive and comprehensive screening tool for identifying IPV compared to other validated tools that focus primarily on physical assault. Evaluation studies of the Tool have demonstrated its effectiveness in identifying IPV among African-American and Caucasian women. The Relationship Assessment Tool (WEB) has not been validated with same sex partners; it can be adapted for use with same sex couples by changing "he" to "my partner" in the screening tool.

This tool can be self-administered or used during face-to-face assessment by a provider. A series of 10 statements ask a woman how safe she feels, physically and emotionally, in her relationship. The respondent is asked to rate how much she agrees or disagrees with each of the statements on a scale of 1 to 6 ranging from disagree strongly (1) to agree strongly (6). The numbers associated with her responses to the 10 statements are summed to create a score. A score of 20 points or higher on this tool is considered positive for IPV.

“Everything you share with me is confidential. This means what you share with me is not reportable to child welfare, INS (Homeland Security) or law enforcement. There are just two things that I would have to report- if you are suicidal, or your children are being harmed. The rest stays between us and helps me better understand how I can help you and the baby.”

We ask all our clients to complete this form. For every question below, please look at the scale and select the number (1-6) that best reflects how you feel.

Additional Client Education Sessions: Reproductive Coercion and Parenting After Violence

- 1) **Question for home visitors:** When should I introduce the “What About Your Childhood” and “Parenting is Hard Work” panels of the *Loving Parents, Loving Kids* safety card?

Answer: During the 8th month/third trimester of her pregnancy or soon after the birth of the baby.

Conversation starter: “We have started talking to all our clients about this Loving Parent’s Card. These two panels are really important because they talk about how your past can affect the way you parent and give you strategies if you ever find yourself frustrated. On the back of the card is a confidential 24/7 hotline in case you are feeling like you are having a hard time with the baby and just need someone to listen.”

Date _____ Card Panels Reviewed **yes/no**
