Mini Strategic Planning Process Toolkit

Future Planning, Prioritizing Discussions, and Planning Resources
For Domestic Violence and Sexual Assault Organizations

This toolkit was produced by Futures Without Violence in consultation with Amy Sánchez, as part of the SOS Institute Project.

This project was supported by Grant No. 2015-TA-AX-K047, awarded by the Office on Violence Against Women, U.S. Department of Justice. The opinions, findings, conclusions, and recommendations expressed in this publication/program/exhibition are those of the author(s) and do not necessarily reflect the views of the Department of Justice, Office on Violence Against Women.

MINI STRATEGIC PLANNING PROCESS

Goal of this toolkit:
Build a common vision for the future of the organization, reach consensus on responsibilities and direction for the organization, develop goals, and create an action plan for implementation.

Mission-based organizational development focuses an organization to build a common framework and understanding so that all involved will:

- See a clear path for the future based in the reality today, strengths, and environment.
- Implement strategic decision-making and selection of priorities.
- Engage fully as leaders, giving opportunity to new ideas and strategies.
- Feel ownership and commitment to good results.

Note: Prior to engaging in this process of prioritizing or building consensus on future goals, it is important to review the mission statement and core values for the organization. The mission statement and core values are the foundation that should guide the visioning and prioritization. This resource on Organizational Values and Mission Toolkit may be helpful. Additionally, as part of the planning, doing an organizational analysis for Strengths, Weaknesses, Opportunities, and Threats (SWOT) may also be helpful, in order to take these considerations when setting future goals. A sample tool is listed on page nine.

How do you know if there is a need for a strategic plan?
When there are questions and unmet needs, including: Staff feels overwhelmed, fragmented, and stale. The organization has chronic financial problems and is “chasing” grants. The board is disinterested. And, there are external factors affecting the organization.

Introduction:
The purpose of this planning activity is to gather consensus and to move a team forward in the same direction for the future. This activity works best if everyone from the team or organization participates, in order to build consensus and ensure equal representation of varying opinions.

A couple of positive results occur after doing this activity:
1. All participants are a part of setting a common direction for the organization. The activity ensures consensus throughout; therefore, the final plan has the buy-in of the entire group.
2. As a director, program coordinator, etc., one gets a very good idea about what the team thinks “today,” as well as its vision for the future.
3. The facilitator leads the process so that the team understands where it is, where it is going, and the three to four priority areas (activities, goals) for the future.

Note: We want to look at where we are today as an organization and where we will be in three years. In order to celebrate our success in three years, (after we get where we want to go) we need to remember where we came from. Also, in order to be realistic about the future, we need to have a clear understanding where we are today.
**Instructions:**

This activity comes in three parts. The first and second parts involve Post-It notes, about 30 per participant. For remote/virtual participation, this process can be adapted with the use of a digital collaboration board like Conceptboard, Poll Everywhere to gather ideas, and virtual breakouts. Advance preparation can be done by gathering anonymous feedback through polls or questions.

**Number of participants:** This activity can be done with small (less than 10 people) and large groups. There is no limit to participant numbers and the process can easily be flexible to accommodate large groups. Later in the directions, two options will be given to ensure full participation of large groups.

**Time:** The number of participants will impact the time for the activity, step 1-2 can take about 90 minutes and step 3 may take 1-2 hours, depending on how in-depth the planning is done.

**Part I: Current Organizational State Assessment**

- Identify where we are today as an organization.

- **Step 1:**

  **Assess your team or organization’s current state.**

  a. With your Post-It notes in front of you, write down at least 10 bits of information about what is going on in your organization (1 on each Post It).
    - It can be anything about your organization today, staff, board, funders, or programming.
    - Make sure that what you write is something that is happening in your workplace today — good or bad. Do not write something that you wish for today, only something that is real.
    - Please be as specific as possible.
      - For example, if you write the word “funding,” on the post-it, participants may not understand the current reality you are trying to describe because they don’t know if that means that we have a lot of funding, or “no funding” or “need more funding for a new initiative.”
        - Specific example: “We are short of funding for key administrative staff.”
      - Another example, if you write “programs” it is difficult for others to know what you are referring to. Do we have good programs, need more staff, or have wonderful evaluation data?
        - Specific example: “Our court advocacy project reaches thousands of survivors each year.”

  b. Work on this for about 8 minutes.

  c. Break-up the group into smaller groups. One option for a larger group is to do the following step 2-3 times. If there are more than 5 small groups of 5-6 members each (total number of participants 25-30) then it is recommended to do Step 2 more than once to facilitate decision making toward the end of the process.

**Facilitator Note:**

Pay attention to the dynamics in the room when you are breaking up participants into groups. Try to ensure good representation of the organization in the groups. For example, if the exercise is being done by the board and staff together, mix up the groups so that each are represented. If you only have staff, ensure that management and program staff are mixed together, etc.
Step 2:

Combine comments and build one sentence that represents your current state.

a. Compile your individual Post-it note comments with the Post-it notes comments for other team members and begin to categorize all of the comments depending on similarities.
   - For a group of more than 4 people, you can break this compilation and categorization up into two groups.
     - For example, combine all of the comments that have to do with staff together in one pile, combine comments that have to do with programs in another, and so forth. Make sure that all of your colleagues read each person’s ideas and participates in categorizing.

b. Next, now that you have read, reviewed, and categorized the entire group’s individual comments, each person writes individually, one sentence that summarizes the varied post-its written by their team.
   - There is one very important rule here, take the necessary time. This is an opportunity for everyone to create the best sentence possible.
   - Spend about 10 minutes on this.

c. Share your individual summary sentence with your small group. Each member does the same. After you have all shared your summary sentence, then the group combines these sentences into one. This sentence needs to reflect the beliefs of the group and each member must agree on the final sentence.

d. If you have a large group, do the above process with all of the groups again by looking at all of the sentences from the teams, going back and working alone to write one sentence that summarizes what has been seen and then sharing in your small group.

e. For the next step, it is recommend to have groups choose a representative to leave the room with the sentence and work with other group leaders to summarize all the sentences into one. The important thing is that the group continues to combine sentences with manageable bits of information so that the ultimate goal would be to have one summary sentence that everyone agrees to.

f. Once a final sentence is agreed upon, participant leaders come back to the full group and read the sentence aloud.

This sentence illustrates the current state of your organization.

Facilitator Note:
While the final group is out of the room combining the final sentence the facilitator can sit with other participants to debrief the process thus far:
   - What did you enjoy about this activity?
   - What was difficult?
   - Do you have observations from the Post-Its that surprised you?
   - How was the group sharing?
Part II: Future State Visioning

- Identify vision or results that organization would like to achieve

The second stage of the “Post-It” process is to follow the same steps in the current state but this time thinking realistically about where the organization will be in three years. Directions are given to “think big” yet “realistic.”

☐ Step 1:

Generate ideas for an ideal and realistic future state of the organization.

a. Use the same process to talk about where you will be as an organization three years from now.

b. With your Post-it notes in front of you, write down at least 10 ideas or goals about what state you think the organization should be in the next three years (1 on each Post-it). Focus can be on programmatic growth, infrastructure, and technology needs.

c. Please write one complete thought on each Post-it.
   - It is crucial that you are realistic in this. Some examples:
     - “We have a full-time executive director.”
     - “The organization has a children’s support program.”
   
   If you write, “There is no more domestic violence in the world”… unfortunately, we know that is not achievable in 3 years. The intention is to write visionary ideas that with time, direction and effort you believe can be accomplished in three years.

☐ Step 2:

Combine ideas and build one sentence that represents your future state.

a. Follow the same process outlined in Part 1 above.

b. Once you have this future sentence, write it on a big flipchart paper along with the first sentence. Read the two sentences out loud.

   These sentences illustrate your current state and your desired future state.

After the current and future state statements are presented to all participants, the facilitator takes the opportunity to reiterate the consensus framework of the activity and to highlight the key factors in both the current and future states. These principal factors will be obvious to all and provides the framework for the last step in the process.

Part III: Develop Organizational Goals and Priorities

- Identify areas of focus and strategies to get from the current state to the desired future state of the organization.

The final piece is to have the groups work together to construct a plan for how to reach your future state. This will develop the three-year summary of goals.

☐ Step 1: Set Goals

- Now that you have your current state and your future state sentences, work with your team to develop 3-4 organizational goals.
- Your sentences should help you decide on your goals.
  - Remember, everyone has to be in agreement, so the process may move forward.
  - For larger groups, one way to reach consensus is to look at the current state and the future state statements and vote for the top five words—or priority areas represented in each state. This will produce the focus areas and help to set goals.
Notes:
- Goals are the long-term, overall changes you wish to cause or produce.
- You may also set separate goals for programs and for infrastructure.
- When developing goals, it’s important to stay focused in the mission of the organization.

☐ **Step 2: Develop Objectives/Strategies**

- With the goals for the next three years, you can begin to develop concrete objectives, strategies, to get you from where you are today to where you would like to be. For each goal you may develop several objectives.

  **Goal #1:**
  - Objective 1 (step):
  - Objective 2 (step):

**Note:** Objectives are specific (short-term), measurable steps/activities that can be taken to meet or reach the long term goal. Objectives need to include the following S.M.A.R.T. characteristics:
- **Specific**, (strategic, simple, and significant)
- **Measurable**, (meaningful, standards to be met)
- **Achievable**, (attainable and also ambitious)
- **Realistic** (results oriented and aligned to the mission)
- **Time-based** (clear deadlines for completion).

☐ **Step 3: Action and Implementation Plan**

**Develop Actionable Activities**
- Each objective needs to include a strategy or key activities in order to achieve the goal. Ensure that strategies are described with clear action verbs.
- As a next step, also add:
  - Strategies/activities:
  - Implementers and supporters (responsible/owner of activity and role):
  - Timeline:
  - Resources needed:

☐ **Step 4: Summarize Actionable Priorities**

**Part IV: Create a Mini-Strategic Plan Outline**

- Develop a summary with the process and results into a document that includes the following:
  a) Mission
  b) Core values (and description of core values)
  c) Current state of the organization statement
  d) Future state statement (vision of the organization for the future)
  e) Goals (several)
  f) Objectives for each goal
  h) Strategies/Activities (for each objective)
  i) Implementers and Supporters (Champion/responsible owners)
  j) Timeline
  k) Resources needed. Achievable financial plan for funding full costs.
Note: You may also include an overview of the process used to create the plan, who was part of the process, and next steps.

**Part V: Action Plan for Implementation**

- Create a plan for implementation.

Below is a table designed to assist each “responsible implementer/champion” in outlining the tasks required to complete a strategic objective, this could be done individually or in a team. Develop a brief description of what needs to be done to accomplish the objective, and then outline each of the tasks involved, a timeline of when they need to be completed, and next steps. “Responsible implementer/champion” reports on progress, completion, and end result.

**Tips for Implementation:**

- Recruit new partners to help implement the strategic plan, divide responsibilities.
- Allocate time to work on plan and set realistic timelines.
- Assess resources needed, including funds, human resources, and other operations/structures.
- Schedule regular follow-up assessment of progress and reporting to meet goals.
- Senior management and leadership need discipline to make the goals a priority.
- If applicable, make it a habit to provide regular updates on progress to the board of directors.
- Include incentives to achieve goals. Discuss accountability and possible consequences.
- Celebrate accomplishments!

**Action Plan Sample Template**

**Goal I:** Long range desired condition, aspiration.
